

What Makes Radiant Facial Oil Iconic:

1. **New Celavive Technology**—Our new facial oil is powered by new cell-signalling active ingredients like Soline and Chloroplast. This unique combination has a moisturizing effect on the skin (that reduces skin sensitivity) and a retinol-like effect on reducing the appearance of fine lines and wrinkles without irritation. Paired with new Celavive technology, these ingredients can help improve moisturization, smooth-looking complexion, fine lines, clarity, and the appearance of wrinkles.
2. **Botanical Oils**—Sunflower Seed, Borage, Jojoba, Coconut, Argan, Pomegranate Seed, Bitter Apricot, and Rose Hip Oil make Radiant Facial Oil stand out in the skincare industry. These naturally derived oils provide ultra hydration for all skin types—especially dry and sensitive—and include extra skin-loving benefits from antioxidants, fatty acids, anti-pollution defenses, amino acids, essential minerals, and more.
3. **Strengthened Skin Barrier**—Our skin loses so much moisture from environmental stripping, weather, pollution, and sun exposure. Radiant Facial Oil helps strengthen your skin's natural lipid barrier to keep moisture in and help skin stay healthy-looking and glowing.
4. **Versatile Application**—You can customize just how a facial oil fits into your skincare regimen. Apply it by itself before you put on moisturizer, or switch things up. Mix a few drops into your serums, add it to your moisturizer. Apply it as the top layer of products to get the very most out of your entire regimen and seal in all that moisture. Facial oil gives skin extra hydration that makes makeup application go on amazingly smooth. Trust us, it will change your skincare game forever and quickly become a staple in your regimen.
5. **Multifunctional Usage Tips**—After you've applied Radiant Facial Oil to your face or neck, run the remaining product into the ends of your hair for extra smoothing action. Apply a few drops to your favorite body moisturizer for boosted hydration. Our facial oil is even the perfect compliment to dermaplaning (using an exfoliating blade to skim dead skin cells and hair from your face) and will leave your skin incredibly soft and hydrated.
